SURVEYING AND SAMPLING STRATEGIES FOR ASBESTOS IN BUILDINGS - P402

3-DAY OPEN CLASSROOM

3-DAY ON-SITE

COURSE AIMS

To provide candidates with the theoretical knowledge and practical ability to undertake surveys of buildings in relation to asbestos. Also, to be able to provide guidance and recommendations for appropriate management actions to minimise exposure to any identified asbestos.

LEARNING OUTCOMES

On completion of this module, the candidate will be able to demonstrate appropriate knowledge and the correct practical methods to:

- Understand building construction and how asbestos was used.
- Identify and take samples of different asbestos containing materials.
- Understand the different survey types and their requirements.
- Carry out material assessments.
- Understand and utilise all safety controls during surveys and sampling.
- Provide accurate and comprehensive survey reports.

WHO SHOULD ATTEND?

The qualification is suitable for duty holders, or anyone who assists them in the discharge of their responsibilities. It is also suitable for anyone who:

- Manages asbestos in buildings.
- Procures asbestos-related services.
- Wishes to progress into asbestos management from asbestos surveying or analysis.
