COURSE AIMS

The purpose of this training is to provide learners with an understanding of the potential hazards and risks associated with asbestos-containing materials (ACMs). Additionally, the course offers a comprehensive outline of the legal provisions that enable employees to protect themselves and others during work-related activities.

LEARNING OUTCOMES

- Identify and describe the different types and properties of asbestos minerals.
- Analyse the health risks associated with asbestos exposure, including the impact of smoking.
- Review general epidemiology and statistics related to asbestos.
- Recognise various types of asbestos and their common uses.
- Identify where asbestos and asbestos containing materials (ACMs) can be typically found within buildings.
- Understand the primary purposes behind the use of asbestos in coatings, insulation, asbestos insulating board, asbestos cement, and other asbestos containing materials.
- Describe the risks of fibre release from various asbestos containing materials
- Demonstrate how to find information about asbestos presence prior to starting work.
- Explain the emergency procedures for situations where asbestos or ACMs are unexpectedly disturbed or discovered during work.
- Comprehend the role of asbestos legislation within the broader context of health and safety laws.
- Summarise key asbestos legislation, focusing on Regulations 5 and 6 of the Control of Asbestos Regulations (CAR).
- Understand Regulation 4's framework for managing ACMs.
